

## IIIM-SANATNAGAR BRANCH

CSIR-IIIM, Jammu, has a branch in the Sanat Nagar suburbs of the picturesque Srinagar city. From its inception, this Institute has contributed immensely towards social betterment/upliftment by fostering human resource development and helping people set up small-scale industries. Currently, the main focus of the Institute is to harness the unique bio-diversity of Kashmir Valley with particular emphasis on medicinal plants and microbial resources for drug development. The process involves multidisciplinary scientific teams, which include plant and microbial biologists, natural and synthetic chemists, biotechnologists, molecular biologists, and pharmacologists from specialized backgrounds. In addition, the Institute contributes immensely to extending technical know-how to local farmers in advanced farming and propagation of various medicinal and aromatic crops.

## ABOUT THE PROGRAMME

The capacity building cum training program is designed to create awareness among students and budding entrepreneurs for livelihood generation in the domain of leather technology. The program will include information about different types of leather and leather products available in the commercial market and the principles behind manufacturing those products. The program will also cover practical demonstrations for designing and manufacturing different leather products like pouches, sling bags, tote bags, etc. The participants will also be informed of the facilities available for pursuing entrepreneurship in leather technology. The following experts from country's prestigious Central Leather Research Institute (CLRI), Chennai, will conduct the two-day program.

**1. Mr. V. Karthik**

*Senior Scientist, CSIR – CLRI*

**2. Mr. Amit Kumar Prajapati**

*Technical Officer, CSIR - CLRI*

The outcomes envisaged for the capacity building cum training program are:

- Understanding the types of leather and their uses
- Understand the operations/processes, materials, machines, and accessories required for goods making
- Become aware of the opportunities for entrepreneurship in leather technology
- Understand the process for design and manufacture of basic leather goods like pouches, bags, etc.

## ABOUT AIC-IIIM

Atal Innovation Mission (AIM) is the Government of India's endeavor to promote a culture of innovation and entrepreneurship. Its objective is to serve as a platform for fostering world-class Innovation Hubs, Grand Challenges, Start-up businesses, and other self-employment activities, particularly in technology-driven areas. Under its core objectives, AIM intends to support the establishment of new incubation centers called Atal Incubation Centres (AICs) that would nurture innovative start-up businesses in their pursuit of becoming scalable and sustainable enterprises.

AIC-IIIM is an organizational setup that nurtures ideas and juvenile technologies of the companies by handholding them to survive during the start-up period. AIC-IIIM aims to create an environment to inspire start-ups and entrepreneurial minds of J&K to pursue innovation and entrepreneurship. AIC-IIIM supports entrepreneurs, new start-ups, researchers, students, institutes/universities, scientists, and small or medium companies who plan to incubate their ideas or budding technologies into commercially successful ventures.

## ABOUT CSIR-IIIM

Indian Institute of Integrative Medicine (IIIM), Jammu (formerly RRL, Jammu) is a state-of-the-art laboratory under the aegis of the Council of Scientific and Industrial Research (CSIR), Union Ministry of Science and Technology, Government of India. CSIR-Indian Institute of Integrative Medicine, Canal Road Jammu, is a premier Drug Research Institute of India and is engaged with a vision to strengthen and advance the drug research and development field in the country. The institute has made significant accomplishments in pursuing its mission of New Drugs & Technologies for affordable healthcare, generating a knowledge base, and nurturing future leaders in the healthcare sector. The current mandate of IIIM is to discover new drugs and therapeutic approaches from Natural Products, both of plant and microbial origin, enabled by biotechnology, to develop technologies, medicines, and products of high value for the national and international markets.
